Mission

The Construction Branch is responsible for producing all-source economic intelligence on the construction of fixed installations and the production of construction materials within the Soviet Bloc, for contributing to the coordination of such intelligence production within the U. S. Government, and for contributing, within its field of responsibility, to national estimates. The scope of responsibility includes generally construction costs, methods, capabilities, material and design standards of constructed fixed installations.

Branch Position in Intelligence Community

S/CST is the only organizational unit which is actively engaged  
in economic intelligence research in the field of construction in the  
various Soviet Bloc countries.

Past work has received coordination with Army, Air Force, and  
State representatives.
